

Infokiosk ML touch desk 910

Indoor touch desk ML kiosk 910 is designed for immersive interactive applications in all indoor commercial markets including education, retail, hospitality, gaming and medical environments.

FEATURES

- PCAP or IR touchscreen
- 43 / 49 diagonal
- painted (piano) metal lockable housing on wheels
- with or without Intel® CPU based computer
- the edge of the housing can withstand 90 kg mass

OPTIONAL FEATURES

- **Touchscreen.** Possible to order with different touchscreen options – intuitive edge-to-edge PCAP or Infrared touch sensors.
- **Branding.** Lot of options to meet your brand style design – custom colours, custom labelling with optional details.
- **Connectivity.** Optional wireless network connectivity options (WiFi, 4G) with vandal proof external antenna to provide kiosk connectivity in all possible locations.
- **Computer.** Intel® NUC computer module ensures smooth and fast user experience for detail rich graphics. PC can be configured to meet performance requirements set by application used.
- **Kiosk software.** Sitekiosk software for operating and maintaining public access kiosks with virtual on-screen keyboard.
- **Kiosk monitoring.** Siteremote running in Cloud (SaaS) or on own
- **server (license) for remote administration and maintenance of kiosk systems and digital signage displays.**
- **Security.** The housing is suited for unattended self-service. Housing can be anchored to floor and is securely lockable with single key.

ABOUT US

We are in kiosk production from 1999. Our production and product development process is certified to meet ISO 9001:2015 requirements. We are proud to design our kiosks in-house keeping in mind both aesthetic and functionality.
